OUR MISSION :
providing a tailored high-quality therapeutic project, comprehensive and integrated, respectfully focused on patient's well-being.

History and evolution

Structure of CNP St-Martin

Asbl Oeuvres des Frères de la Charité

St-Martin Neuro-Psychiatric Centre comes under the non-profit association Oeuvres des Frères de la Charité.

CNP St-Martin is made up of

- the Neuropsychiatric Hospital (HNP) made up of 9 psychiatric care wards
- 3 psychiatric care houses (MSP)
- 1 day care hospital «Mosaïques» (HJM)

The past

For more than a century, **St-Martin Neuro-Psychiatric Centre (CNP)** has been taking care of patients suffering from **psychiatric disorders**.

Despite of the mental health care and psychotherapies progress over time, the image of psychiatry remains frozen in the past for a long time.

The present time

Today, **CNP St-Martin** totally fits in with **modern psychiatry** and takes up the challenge of setting up a consistent **Mental Health Care system** in a close **network** with the various healthcare workers.

In this context, **St-Martin Neuro-Psychiatric Hospital (HNP)** reinforces its **collaborations** with the psychiatric departments of general hospitals around Namur, the first-line caregivers and various shelter and support structures (drug addiction, intellectual deficiency, etc).

HNP also actively takes part to the continuity of care through assisted housing programmes (IHP), psychiatric care houses (especially St-Martin MSP), Mental Health workers, care homes, etc.

The future

Through this network dynamics, **CNP** is involved in various **innovative projects** and confirms its commitment to **the future of psychiatry** : **providing specialised care that suits best to the patient needs**.

CNP St-Martin in figures

295 authorised hospital beds
90 MSP permanent beds

1681 admissions in 2017

1657 discharges in 2017

Annual patient flow : 1053
in 2017

1100 meals/ day

26.361 m² occupied

(*) HNP only

CNP St-Martin is actively involved in numerous Mental Health-related projects, locally, nationally and internationally. Some of them are also assigned to scientific research.

MSP : 3 MIXED PSYCHIATRIC CARE HOUSES

- SÉNEVÉ ■ MÉRIBA ■ LES ENTOURS

The psychiatric care houses are living or transition places for people suffering from a stabilized psychiatric problem and/or suffering from slight to moderate intellectual deficiency. The MSP receive persons who are not able to live independently but who possibly have the potential to do so. Each of the 3 MSP Saint-Martin has its own specific features.
